

Camera-to-cloud video management system

A frictionless cloud ecosystem

OnCloud natively supports over 90 Hanwha Vision camera models in a variety of form factors.

Always accessible

Easy access via mobile app or web for centralized cloud video management.

Intuitive and instant

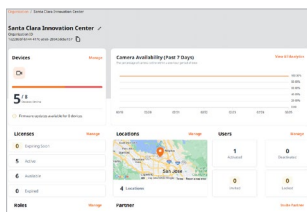

Find footage, gain insights and manage multiple cameras with ease.

Infinitely scalable

Add cameras, locations and users without limits.

Feature-rich cloud video management

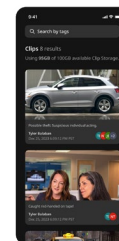

Intuitive dashboard

Immediately see important metrics within your organization – your devices, uptime, licenses, locations and users.

Camera wall

View up to 12 cameras at once and build saved views to quickly access device groups.

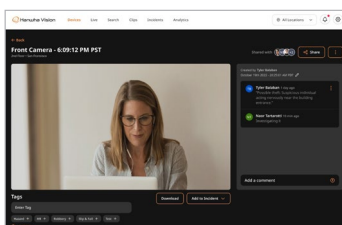

Simple search

Easily find what you're looking for using OnCloud's natural language search.

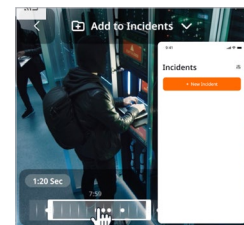

Notifications and alerts

Get instant event alerts for auto-detection of people and objects, intrusion detection and more.

Evidence sharing

Quickly create clips and tags for organizing evidence – and invite others to share and comment.

Incident management

Manage incident details, add clips and invite others to collaborate by adding notes and documents to each case.
